SNORKELING

Snorkeling is a fun and relaxing way to view the colorful and fascinating world just beneath the ocean's surface. Snorkelers use a clear plastic mask and a short tube to breathe while floating face-down on the surface of the water. This way you can observe coral and marine life without scaring them away the fish with your movements and without having to come up for air every minute. Just floating and being immersed within the underwater scenery is enough to escape the hurdles we encountered in everyday life. There are different locations where you see totally different environment with different fishes and sea creatures.

A photograph of a group of children playing on a beach at sunset. The children are silhouetted against the bright, low sun, which is reflected in the wet sand. One child is jumping in the air, while others are standing or running. The sky is filled with soft, wispy clouds. The overall mood is peaceful and nostalgic.
